

DID YOU KNOW - LED HEADLAMPS

Available Popular Options

In our quickly advancing world of vehicle technologies, we want to highlight our LED headlamps as an available, simple upgrade that helps to close the gap from a personal vehicle experience to a bus driver's experience. With further electrification in the school bus industry and more focus on employee experience as a part of successful driver retention, these small upgrades yield great benefits. Beyond the improved visibility that LED headlamps provide for drivers, reduced maintenance of LED headlamps makes this selection a win-win for your customers.

LED headlamps to retrofit customer units are available through our Aftermarket Parts as well. These lamps are an easily replaceable plug and play solution designed with accessibility in mind to allow quick aim of the beams.

LED headlamp selections are available for your Saf-T-Liner C2, HDX and EFX orders. See the table below for sales code details and, as always, please refer to our popular options brochure to see other great choices for your Thomas Built Bus!

Features and Benefits

- Improved visibility for drivers
- Decreased driver fatigue at night
- Extended service life – rated at over 30,000 hours
- Sunlight color temperature of light beam
- 2A Low Beam | 3A High Beam @ 12.8V
