

The S.T.A.R.S Mounting System uses wall-mounted seats with the feet secured to the floor using specially designed anchors. The bolts attaching the seats to these anchors allow the seat to be easily removed and reinstalled from inside the bus. When reinstallation is needed, the seats will only go back in the location as designed and installed from the factory. This allows easy reconfiguration of buses, based on the number of special needs students and will utilize pockets or segmented track for the attachment of wheelchairs.

### The S.T.A.R.S. Mounting System:

- Meets all state and federal safety regulations, including FMVSS 210, 213, 222 and 225.
- Allows passenger seats to be removed and reinstalled more easily than seats attached to continuous floor track.
- Provides access for repairs to floor mounted heaters by providing easy removal of the seat over the heater.
- Is standard on Jouley and required to allow serviceability over battery packs.
