

# Zonar – Smart Fleet Management System

Available Options

Did you know your bus already has a Zonar telematics control unit (TCU) on board. Zonar technology comes standard on Saf-T-Liner® and Minotour® models equipping your buses to provide insightful vehicle data to manage fleet efficiency, increase safety and maximize uptime: •Track the location, speed and fuel consumption of your bus. •Get a direct line to your Detroit or Cummins engine with seamless remote diagnostics services. •Monitor driver performance and deliver state-of-the-art in cab training. •Gain access to instantaneous rider reporting, so you know when each student enters and leaves the bus.

**60-day free-trial, start any time:** Try before you buy to make the decision to install a smart fleet management system that much easier. Whether you are buying a new bus or adding Zonar to a bus in your current fleet, you can still participate in the 60-day free trial by activating the factory installed Zonar TCU. [Contact a Zonar specialist to get started](#) - (877) 843 3847 #1.

Features and Benefits

You can maximize your fleet’s performance and uptime with the ability to decode fault events and proactively manage maintenance costs regardless of your engine choice. **Detroit™ Connect Virtual Technician™** helps to make informed service decisions within minutes of an engine or aftertreatment fault event by notifying fleet managers that a fault code has been triggered, diagnosing the root cause of the code, recommending a solution and helping source the parts needed for repair. The unique analytics data sent by **Cummins Connected Diagnostics™** is more valuable than a simple lamp on the dash and more complete than raw data pulled from the electronic engine system. It identifies and prioritizes the fault codes, determines the probable cause of the fault and reports this information to fleet management.
